

Philosophy 3334 Summer 2020
Reading questions #11
Due Wed, Jun 17th

1) In chapter 3 of *The Expanding Circle*, Singer points out that E.O. Wilson suggests three distinct ways in which science can contribute to ethics. What are these three different ways? Does Singer agree that science can contribute in each of these three ways? For each of the three ways, say whether Singer agrees or not and very briefly, why.

2) After reading the chapter, come up with a question that you want answered or a topic that you would like to be discussed. This could be something that the chapters forced you think about or it could be something that you thought was particularly confusing in the chapter.
