

## **Philosophy 4310 — Paper Assignment #2**

You should email your paper to me – joel.velasco@ttu.edu - by 2:00pm on Tuesday, May 16th.

The paper should be an argumentative essay of roughly 5-8 pages (1800-3000 words). It should be relevant to the second half of our class so that almost certainly means that it should at least involve subjunctive conditionals. But the exact nature of the paper might vary quite broadly. For example, it could be about the logic of counterfactuals, about comparing indicative and subjunctive conditionals, about causation, or even about the miner puzzle in the paper by Kolodny and MacFarlane.

It should be obvious from your paper that it is a relevant topic, but if you have questions about whether a certain paper topic would be appropriate, please come and see me.
